

AccelTrilogy Wins 'Best Use of AI in Insurance' at India InsurTech Summit 2026

AccelTree Software celebrates industry recognition for transforming insurance operations with AI-powered innovation.

We are proud to announce that our flagship insurance platform, AccelTrilogy, has been honored with the "Best Use of AI in Insurance 2026" award at the prestigious India InsurTech Summit 2026.

The award recognizes AccelTree's continued commitment to driving digital transformation across the insurance industry through intelligent automation, AI-powered decision-making, and seamless customer experiences. The recognition places AccelTrilogy among the most innovative insurance technology solutions in the country.

The India InsurTech Summit 2026 brought together leading insurers, technology providers, startups, and industry experts to showcase innovations shaping the future of insurance. This year's awards attracted participation from more than **42 organizations competing across six categories**, making the recognition a significant milestone for AccelTree Software.

Driving the Future of Intelligent Insurance

AccelTrilogy is an AI-powered unified platform that integrates **Agency Management, Lead Management, and Electronic Point of Sale (ePoS)** into a single intelligent ecosystem. Designed specifically for insurance enterprises and their distribution networks, the platform empowers agents with real-time insights, workflow automation, and AI-assisted decision-making throughout the customer lifecycle.

By bringing together fragmented systems into one unified experience, AccelTrilogy enables insurers to:

- Accelerate customer onboarding and policy issuance
- Improve agent productivity through intelligent automation
- Deliver personalized customer engagement
- Streamline sales and servicing workflows
- Enhance operational efficiency with AI-driven insights

A Recognition of Innovation

Receiving the **Best Use of AI in Insurance** award reflects AccelTree's vision of building practical AI solutions that solve real business challenges within the insurance sector. Rather than focusing solely on conversational AI, AccelTrilogy leverages Artificial Intelligence to automate complex business processes, assist insurance advisors, and orchestrate end-to-end insurance operations.

The platform demonstrates how AI can move beyond answering questions to actively enabling business execution - helping insurers improve service quality while reducing operational complexity.

Leadership Perspective

"This recognition is a testament to our team's relentless focus on building AI solutions that create measurable business value for the insurance industry. AccelTrilogy was developed with the vision of empowering insurers and advisors through intelligent automation, unified workflows, and actionable insights. We are honored to receive this award and remain committed to driving the next generation of AI-led insurance transformation."

Looking Ahead

As insurers continue to embrace digital transformation, AccelTree Software remains committed to investing in advanced AI capabilities, workflow orchestration, and enterprise automation solutions that redefine how insurance organizations engage customers, empower agents, and deliver operational excellence.

The recognition at the India InsurTech Summit 2026 further reinforces AccelTree's position as a trusted technology partner for insurers seeking scalable, secure, and intelligent digital solutions.

About AccelTree Software

AccelTree Software Pvt. Ltd. is an innovative technology provider to the insurance and banking sectors, with two decades of experience in enterprise solutions and a wide technology cluster for the BFSI space. Over the decades, AccelTree has built tailor-made solutions and ecosystems for prospective clients with a one-stop shop approach that includes a suite of engineering and consulting services across different industries and verticals. Our solution journey begins with ideation, which translates to conceptualization and final product development and lifecycle management. The 'think tank' (core team) at AccelTree constantly studies industry trends and comes up with path-breaking solutions through innovation—a case in point being the unique remote agent capability (patented).
